Minimum
Disruption

A supercentre was created for B Braun, part of their strategy to provide the latest state of the art sterilisation units for tracking and sterilising surgical instruments.

Challenge

The sterilisation and packaging facility build was part of a £10 million investment by B Braun to provide a state of the art sterilisation service. The challenge was to transform an existing industrial shell into this leading edge sterilisation facility.

Works Completed

Building Projects Group was part of the contracting team to develop this existing industrial. Building works completed included:

- Project management
- Enabling works
- Fire protection
- Full construction
- Toilet blocks
- Change areas
- Specialist joinery
- 15,200 sq ft of suspended ceilings lay in grid satin spa
- Installation of cleanrooms
- Fit out of offices
- Fit out of all partitions and fire wallscovering 21,690 sq ft
- Metal pan Burgess ceilings covering 9,440 sq ft

Solution

The project was completed on time and the client was extremely satisfied with the high standard of the works and attention to detail. B Braun now has a state of the art facility at their Kings Norton headquarters to enable the outsourcing of sterile services. The new decontamination centre utilises the latest processing technologies and incorporates some of the most modern systems for tracking surgical instruments throughout their life cycle, from purchase to eventual disposal. This includes linking instruments to individual patients.
