

BPG Transforms Brigshaw High School

CASE STUDY

SECTOR

Education

CLIENT

Brigshaw High School

Building Projects recently delivered a toilet refurbishment scheme for a client in Castleford, Brigshaw High School.

Challenge

Building Projects Group were appointed by Brigshaw High School in Castleford to undertake and deliver a complete toilet refurbishment to the male and female WC's, to form a merged unisex toilet area. The school remained operational throughout part of the project, this meant strict co-ordination and co-operation was required between our team and the school. With our high expertise and track record of working in live environments, this was not no issue at all. Due to the nature of the scheme, it meant the school was restricted on toilet facilities. Despite this not being a massive issue to the school, it was still vital for BPG to maintain a strict programme and ensure no delays.

Solution

Building Projects Group Scope of works included:

- Design development
- Health and Safety Management
- Projects Management
- Co-ordination and co-operation with the client
- Segregated and protected site set-up including temporary hoarding as the site was a live environment
- Strip-out of the existing toilets
- Strip-out of existing M&E
- Extend existing opening for the toilets
- Pipe modifications to supply new toilet requirements
- New cubicle systems
- New vanity systems
- New sanitaryware
- New flooring
- New lay-in-grid ceilings
- New MF ceilings
- Plasterboard and plastered walls throughout
- Decoration throughout
- Complete M&E throughout
- New fire alarm works throughout; connected onto existing system

Benefits

Building Projects Group completed this scheme on time and within budget. We successfully co-operated with the school, maintaining a strong system of communication at all times to ensure no disruption was brought to the day-to-day running and operations of the client.

The site was kept clean, and dust was minimised to the lowest point at all times. Works which required loud tool use was strategically planned around the students lesson times to, again, ensure no disruption.
